RESEARCH GRANT AWARDEE
Awarded by Japan Foundation
September 2021

PROFESSIONAL EXPERIENCE

Full-Stack Developer March 2021 - Present
Freelance

- Designed UI templates and developed custom websites using React, HTML5/CSS and JavaScript ES6
- Implemented various algorithms to solve coding problems encountered during development
- Used React to create single-page apps, such as my Portfolio Website.
- Built multiple projects most of which are available for preview at my Portfolio Website
- Built custom API to interact with databases (e. g. MongoDB)

PROJECTS

InContact – a Social Network
- Developed a full-scale single-page app using **React** and **Redux**. GitHub Repo Here.

FarerLib – an online library
  Developed a Full-Stack online library web app and implemented:
- JWT-based user authentication
- Database interaction (MongoDB) via custom-built API (Express, Node.JS)
- AI-generated content (integrated *DALL-E API*)
- High optimization and responsive design
  GitHub Repo Frontend / Backend

Checkers Game
- Built Checkers game using **JavaScript**, CSS, and HTML. GitHub Repo Here.

EDUCATION

Language Interpretation and Translation 2018 - 2022
Far Eastern Federal University
